S3CN – Overview of the project

Jan Jareš
analytik RIS3
jares@jvtp.cz

What is S3 Couple Net?

- „Cross-border network for activating the S3 strategy of the South Bohemian Region and Upper Austria“
- Joint initiative of South Bohemian Science and Technology Park and Business Upper Austria
- RIS3 Strategy for South Bohemian region vs #upperVISION2030
- Finally, due to similar structure and methodology, it is possible to meaningfully compare the two strategies
- To identify synergies, overlaps, potential for cooperation
- 16 months (until 12/22)

- Research of current RDI infrastructure on both sides
- Comparison analysis of both strategies
- Activation of cross-border network (key actors, decision makers)
- Analysis of current regional supportive schemes for RDI
- Proposal for cross-border synchronization / coordination of the schemes
- RDI services interactive catalogue + S3CN website
- Indicative set of potential cross-border projects + partnership proposal

Expectations & Goals

- Platform like structure of the network
- Defined potential and pool of partners for future cross-border projects
- Mutual inspiration / know-how exchange for regional funding of RDI
- Covering for demand of RDI services
- Joint approach / mutual access to data for future update of regional strategies and policies (if needed)

What's done and what's ahead of us?

- ✓ Research of current RDI infrastructure on both sides
- ✓ Comparison analysis of both strategies
- ✓ RDI services interactive catalogue
- ✓ S3CN website
- Activation of cross-border network (key actors, decision makers)
- Analysis of current regional supportive schemes for RDI
- Proposal for cross-border synchronization / coordination of the schemes
- Indicative set of potential cross-border projects + partnership proposal

What's done and what's ahead of us?

- Elaboration of S3 strategies in Upper Austria and South Bohemia:
 - Historical background
 - Strategy development process
 - Description of focus topics / action fields
 - Implementation
- Comparative analysis

Introduction – Strategic Programms in the UA History

Strategic Programme OÖ 2000+

1998 - 2003

3 Strategic Fields, response to economic crisis in 1980s;
Foundation of a central economic agency, Focus on technology, professional qualification and location marketing

#upperVISION2030
Wirtschafts- & Forschungsstrategie OÖ

Strategic Programme „Innovatives OÖ 2010“

2005 – 2010

5 Strategic Fields, 43 Action Fields, stakeholder process including 250 experts;

Focus on research and development, professional qualification, clusters and networks, EU networking

Strategic framework for activities with a clear focus on a few, significant and strategic issues and fields regarding Upper Austria

Moving away from the current practice of developing a concept for the coming years and starting **an annual strategy development and implementation system**

Strategic Programme „Innovatives OÖ 2010plus“

2010 – 2013

5 Strategic Fields, 37 Action Fields

Follow-up of predecessor programme, similar focus areas
Research and development emphasis on Mechatronics, ICT, Life Sciences, Innovative Materials, Logistics, Renewable Energy

We make a difference to the previous 5 year plans

- Create awareness among the location partners
- Work on strategic decisions, develop appropriate systems and focus on a few & relevant topics
- Ensure for alignment of location partners
- It's not about lobbying, but taking serious steps and develop measures for the region

Strategic Programme „Innovatives OÖ 2020“

2014 – 2019

4 Strategic Fields, 5 Action Fields

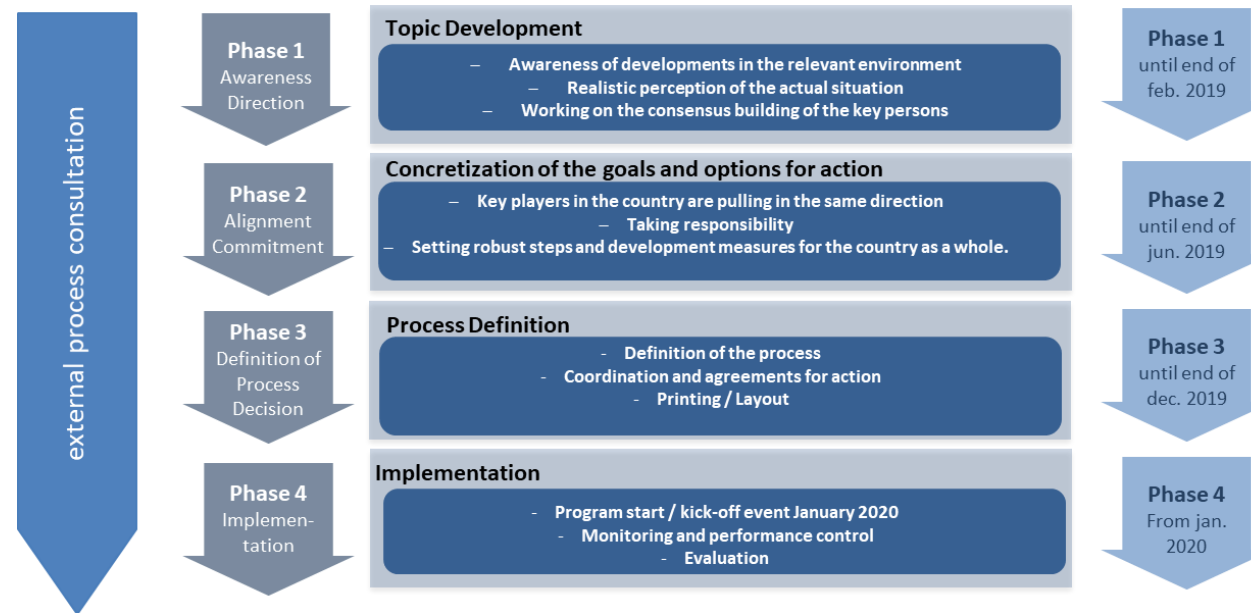

Introduction / History – Strategic Programms and RIS3

- **2008-2010: Regional innovation strategy (2008-2014)**
 - 4 priorities, 11 measures
- **06/2014: Regional Annex to the National RIS 3 (2014-2018)**
 - **3 key areas for changes** (1. Quality human resources, 2. Cooperation and technology transfer, 3. Business Development)
 - **3 domains of specialisation** (1. Biotechnology for sustainable development of society, 2. Mechanical engineering and mechatronics, 3. Electrical Engineering)
- **06/2018: Regional Annex to the National RIS 3 (2018-2021)**
 - **3 key areas for changes** (1. Quality human resources, 2. Cooperation and technology transfer, 3. Business Development)
 - **5 domains of specialisation** (1. Mechanical engineering and mechatronics, 2. electronics, electrical engineering and IT IT, 3. Biotechnology for sustainable development of society, 4. Automotive, 5. textile and clothing industry)
- **06/2020: RIS3 strategy of the South Bohemian reg. (2021-27)**
 - **4 key areas for changes** (1. Quality human resources, 2. Cooperation and technology and knowledge transfer, 3. Business Development and innovations, 4. Development of digitalisation, smart solutions and Industry 4.0)
 - **5 domains of specialisation** (1. Mechanical engineering and mechatronics, 2. electronics, electrical engineering and IT IT, 3. Biotechnology for sustainable development of society, 4. Automotive, 5. textile and clothing industry)

recent marketing slogan: **SOUTH BOHEMIA - a place where you don't have to compromise**

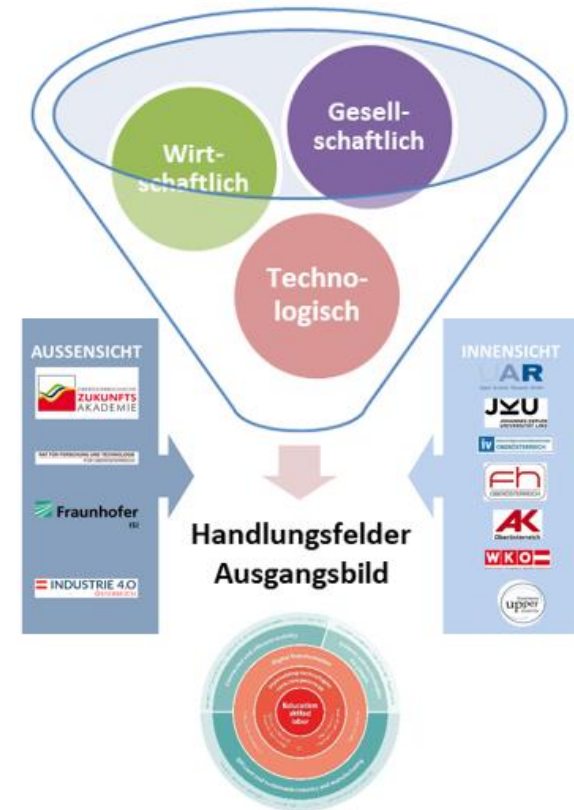

- External experts and Upper Austrian location partners were involved in the development process.
- In total 4 external experts accompanied the process and strategy development:
 - Fraunhofer (international)
 - NAPFI 4.0 (national)
 - The Upper Austrian Future Academy (regional)
- The main consultant Trigon was responsible for designing the whole process

- Analysis of 61 trends: Relevance for Upper Austria
 - Prioritization by location partner
- Selection of 21 trends / analysis of the environment:
 - Validation of trends by facts and statistics
 - Identification of competences, technologies and potential for Upper Austria
- Conversion of 10 selected trends as a basis for future scenarios
 - Validation of trends by Upper Austrian dedicated facts and figures
 - Development of future regional scenarios
 - Evaluation of specific regional challenges and derivation of robust topics
- Transfer into 4 action fields

Digitalisation / Digital Transformation

Connected & efficient Mobility

Systems & Technologies for People

Efficient & sustainable Industry and Manufacturing

- **Relevant strategic documents at the regional level**

- Development program of the South Bohemian region 2021-2027
 - Priority Axis 1: Smart region and competitive regional economy
 - SG No. 1.1: Support and development of smart solutions in public administration
 - SG No. 1.2: Regional competitiveness and support of business activities
 - SG No. 1.3: Creating conditions for the educational economy, science, research and innovation
 - SG 1.4: Territorially balanced development and support of traditional industries
 - Innovation in the each individual priority axes

- Strategic plan of the Smart Region in the South Bohemian Region

- Topics: Mobility, Digitization, Energy, Environment, Health and social services, Increasing the competitiveness of the region
- Strategic plans at the municipality level (several)

- Development strategies of university, colleges and research organisations

- Digital Transformation
 - Includes almost all areas of life and is an enabler/basis for the further development of the latest technologies
 - Significant influence on the Upper Austrian economy and industry
 - Data-based decisions are becoming more important in companies
- Systems & Technologies for People
 - The lack of specialists and the demographic development are constraining the further development of the location Upper Austria
 - allow people to participate actively in their familiar environment for a longer period of time and will affect our future in different areas like economy, industry, medicine, mobility and private demands
- Efficient & sustainable Industry and Manufacturing
 - Politically defined targets are highly relevant for UA
 - Circular economy makes a significant contribution to a CO2-reduced economy
 - Renewable energy plays an essential role for the economy in the region and is at the same time a key factor for a competitive reduction in the consumption of fossil fuels by the energy-intensive industry
- Connected & efficient Mobility
 - structural change in the mobility sector has a significant influence on the Upper Austrian economy and location
 - Developments in the area of the powertrain will lead to serious shifts in the existing value chains
 - innovative mobility services will gain more importance

- **The importance and use of the S3 strategy**

- 1 national strategy (approved 01/2021) + 14 regional annexes
- Basic condition for funding under EU research, development and innovation (R & D & I) policy
- € 4.7 billion of EU funds in the period 2021-2027 through the RIS3 strategy in the Czech republic

- **Domains of specialisation in the SB region:**

- Mechanical engineering and mechatronics
- Electronics, electrical engineering and IT
- Biotechnology for the sustainable development of society
- Automotive
- Textile and clothing industry

- **National domains of specialisation:**

- Advanced materials, technologies and systems
- Digitization and automation of production technologies
- Electronics and digital technologies
- Ecological transport
- Technologically advanced and safe transport
- Advanced medicine and drugs
- Cultural and creative industries as a tool for accelerating the socio-economic development of the Czech Republic
- Green technologies, bio-economics and sustainable food resources
- Smart cities

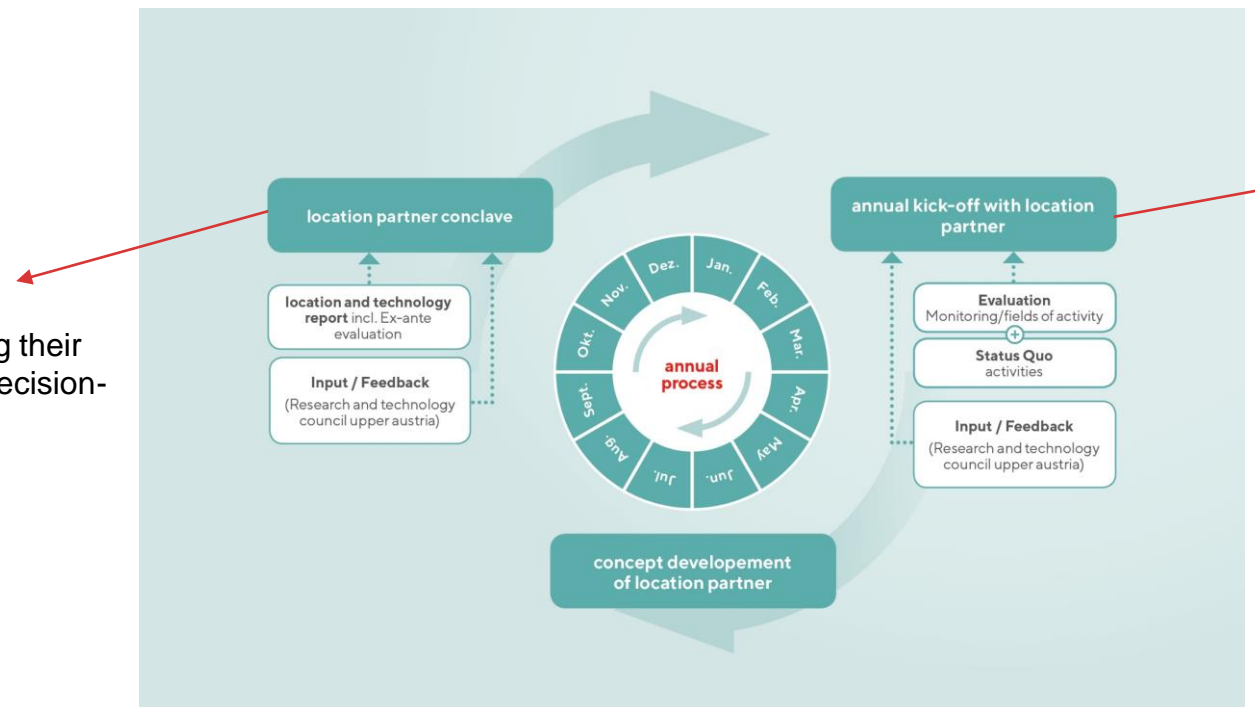

Linkage to domains of specialization of National RIS3

- Annual process is stable and repeated every year
 - Start: Kick-off with location partners (Input: Monitoring data of the previous year, Focus topics, Feedback other location partners)
 - Concept development and definition of final activities for the next years
 - Finalizing program book (includes activities of location partners) and location report (includes economic data and monitoring data of #UV2030)
 - Location partner conclave (also called strategic meeting with the steering group)

Steering Group:

Establishes commitment regarding their concepts; final coordination and decision-making authority on the defined milestones and agreements

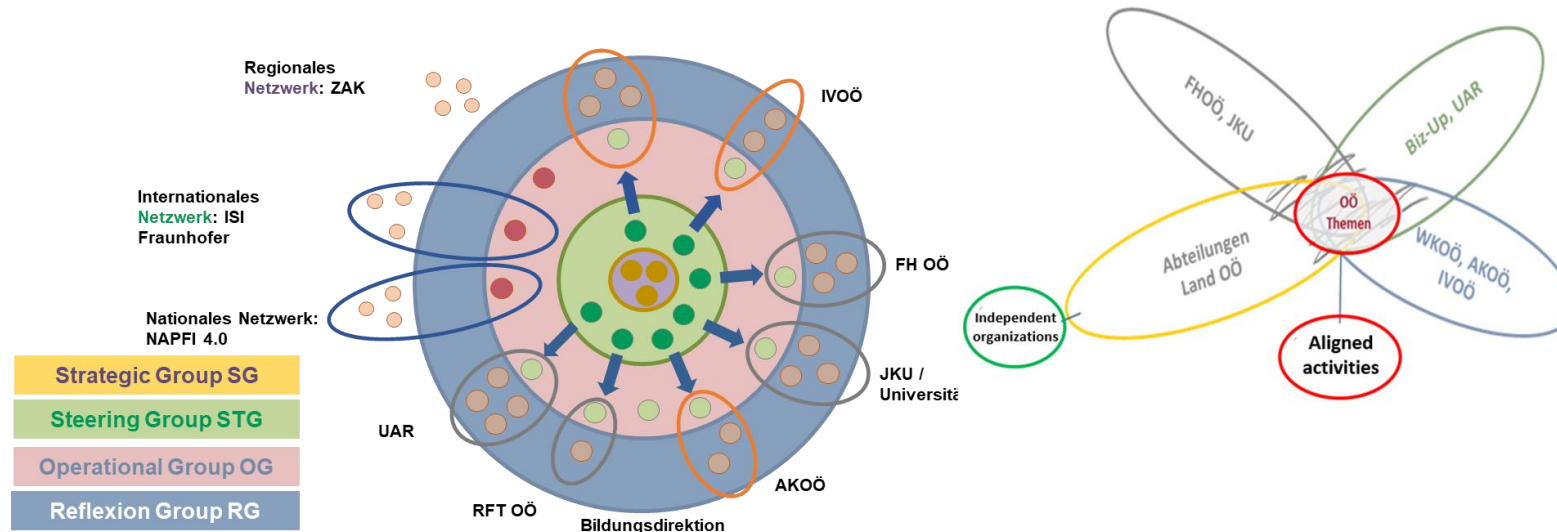

Operational Group:

nominated persons from steering group → the operational group develops strategic activities for each action field; representatives of the steering group members

- Who are the so-called “location partners”?
 - Johannes Kepler University – JKU
 - University of Applied Sciences – FH OÖ
 - Upper Austrian Research – UAR
 - The Federation of Upper Austrian Industries (IV – Industriellenvereinigung OÖ)
 - Upper Austrian Chamber of Commerce (WKOÖ – Wirtschaftskammer OÖ)
 - Upper Austrian Chamber of Labor (AKOÖ - Arbeiterkammer OÖ)
 - Business Upper Austria - Upper Austrian government's location agency
 - Council for Research and Technology Upper Austria

Smart Accelerator 2 in the South Bohemian region 2 (project team) - operative

- system project (implemented in all regions)
- connecting stakeholders, their activities, projects and support tools focused on the development of innovation and creating an effective innovation system of the region

Innovation Commission (appointed by the Regional Council) – 2x a year

- advisory body of the South Bohemian Region Council in the field of support for innovative entrepreneurship, science and research
- coordination of the preparation and implementation of RIS3 strategy, management of action plan

Subjects implementing strategic projects (included in AP RIS3) - operative

- the most important level of strategy fulfilment
- action plan of RIS3 strategy

Regional innovation platforms – 2x a year

- South Bohemian Employment Pact
- Commission Smart Region South Bohemia
- JAIP (Board of Consultants)
- Association for bioeconomy and circular economy (from 09/2020)
- South Bohemian Digi Hub (from 06/2021)

RIS3 strategy update (2023) - update of analytical inputs, revision of domains of specialisation, revision of the overall focus of the strategy

Comparative Analysis

Miroslav Kotoun
RIS3 Manger
kotoun@jvtp.cz

Comparative analysis of S3 abstracts of the strategies of UA and the SB

- Elaborated by: RERA a.s., March 2022
- Supporting documents: abstracts of both strategic documents

Topics of the comparsion - content:

- Strategy development process
- Comparison of structures and role of key actors
- Comparison of content and S3 strategy focus
- Comparison of the process of implementation and monitoring
- Starting points, potential and synergies for cooperation
- Conclusions

- **Continue the cooperation whose basic parameters are set by the S3 CN project**
 - further maintenance of project outputs, exchange of experience and information
 - follow-up project(s)?
- **To link more intensively the sub-implementation structures of the S3 strategies**
 - reciprocal participation in relevant meetings within the implementation of S3 strategies
 - cooperation between the structures existing within the ERDV
- **Further develop existing or emerging cooperation networks and projects**
 - Further development of the cooperation networks established in Interreg projects (e.g. AI, VR/AR)
 - follow-up project(s)?
- **Promote entrepreneurship, innovation and healthy competition in a cross-border dimension**
 - cross-border competitions (e.g. Czech-Austrian "Cross-Border Idea & Start-up Contest")
 - cross-border hackathons, start-up camps, presentations of innovative business ideas

- **Contribute through activities linked to S3 to address societal challenges and global megatrends**
 - digitalisation, automation, AI....but also: poverty and inequalities, energy resources, climate change...
 - joint cross-border projects
- **Support trilateral cooperation on the regions of SB, UA and Bavaria**
 - The S3 strategy of Bavaria (ICT, efficient production technologies, mechatronics, automation and robotics, biotechnology and systems biology, new and intelligent materials, nanotechnology and microtechnology)
 - Emerging thematic networks (Open Data or cultural and creative industries) – follow-up project(s)?
- **Promote more awareness raising and popularisation of topics related to the S3 strategies and their objectives**
 - e.g. joint workshops, conferences, working groups and other forms of networking
- **In addition to cross-border cooperation, encourage greater regional involvement in international activities**
 - e.g., participation in S3 platforms at EU level, international projects (Interreg, Horizon Europe etc.)
